## BAYER Architectural Metal Letters

Three-dimensional signs and symbols by A. J. Bayer Company give dignity, beauty and distinction to buildings. They are always in perfect harmony with any architectural style and surface texture. Handcrafted only in virgin metals—bronze, aluminum, brass, nickel-silver and stainless steel—they last forever.

At A. J. Bayer Company you get a complete selection of styles and sizes ranging from letters of classic simplicity to bold block letters and to contemporary letters with modern flowing lines.

Write for the new Bayer catalog illustrating the variety of basic alphabets, script styles and custom letter styles which are available. Complete specifications included.

## BAYER Art Metal Plaques, Tablets and Symbols

Complete freedom of design is yours with Bayer's custom art-metal craftsmanship—for plaques, tablets, trademarks, emblems, bas reliefs, statuary, and portraiture.

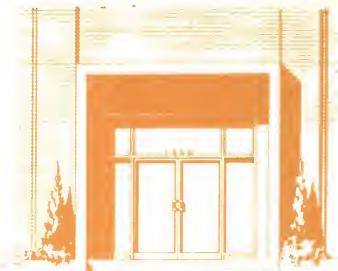

A. J. Bayer Company's accomplished sculptors and craftsmen have preserved for more than half a century the techniques and skills of an almost forgotten handcraft.

Art metal sculpture can be produced at A. J. Bayer Company in bronze, aluminum or nickel-silver with a variety of beautiful finishes.

For information or consultation without obligation, phone or write today.

### Custom Entrances

Monumental entrances for Class A buildings demand the custom quality workmanship of A. J. Bayer Company. The fenestration is always skillfully integrated into the facade in a manner both impressive and inviting.

Every custom entrance built by A. J. Bayer is carefully engineered, detailed and fabricated to the highest quality standards. Bayer standard components are used wherever possible to lower costs.

Entrances for buildings are fabricated by A. J. Bayer Company in stainless steel, aluminum, nickel-silver, brass or bronze in a wide variety of finishes.

### Hollow Metal Doors

There is a wide range of applications for hollow metal doors. In the custom ornamental class, the two massive church facades display hollow metal doors with interesting ornamental effects.

A. J. Bayer Company fabricates custom quality hollow metal doors of all types and styles. They may be formed from a variety of materials: bronze, aluminum, brass, stainless steel or furniture steel with porcelain or enamel finish. Detail drawings of basic standard doors are available upon request.

For information, specifications and detail drawings on Bayer hollow metal doors, phone or write today!

## Steel Stairs

Everything from standard structural steel stairs to graceful ornamental custom spiral stairs are fabricated and installed by A. J. Bayer Company. Regardless of type they are constructed to the highest quality standards of workmanship and materials.

At A. J. Bayer Company you get complete custom service—engineering, detailing and fabrication plus the experience and know-how of more than fifty years service to architects. Bayer forms all treads and risers on their own heavy press brakes. All welds are uniform and smooth ground.

For information, specifications, and detail drawings on Bayer steel stairs, phone or write today!

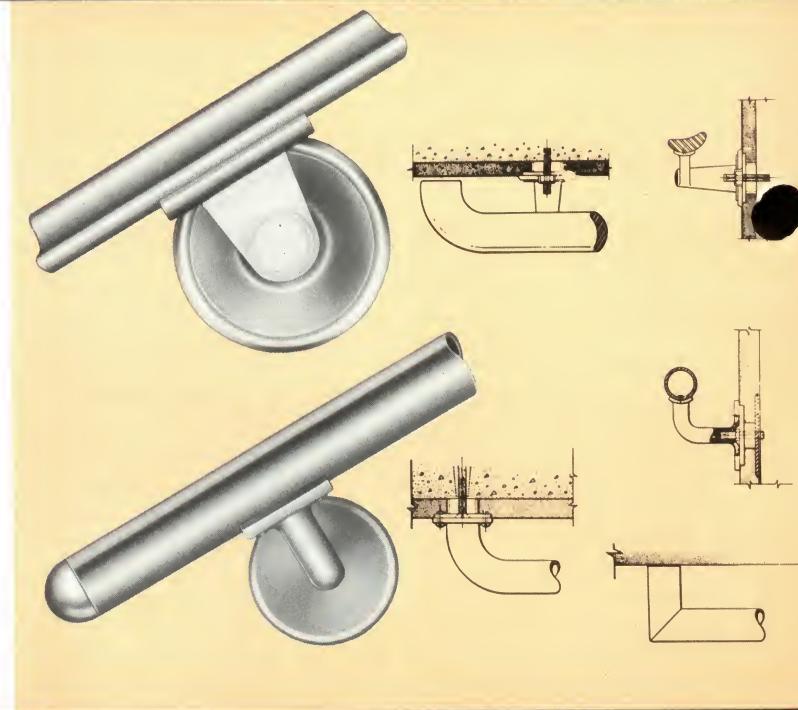

# BAYER

## Hand Rails

Only the highest quality workmanship is permitted on A. J. Bayer handrail fabrication and installation whether the rails are simply utilitarian or a custom designed ornamental type. They are made in all architectural metals — aluminum, stainless steel, nickel-silver, brass, bronze, mild steel — and in a variety of finishes.

Detail drawings and specifications are available for many handrail types and styles. Phone or write for information.
